

LIFE INSURER DATA-FEEDS

UTILISE OMNIUM'S EXPERTISE IN CLIENT POLICY FEEDS

Two solutions we can provide

1) Develop the data-feeds technology for your insurance company and integrate it with current adviser solutions

Utilising our experience in developing Life Insurance software solutions and API's for Life Insurers, we can build out a solution that opens up your client policy feeds and then help it integrate it with current advice software for advisers to view in real-time inside of their software of choice.

2) Integrate your established data-feeds with current adviser solutions

We can take your existing live client policy feed and integrate it with multiple advice software platforms, saving you from having to deal with and connect with each software provider separately.

Who we currently connect with:

Current adviser solutions we already connect with & can provider your data-feeds to:

- *Provisio*
- *COIN*
- *CCube*
- *Practifi*
- *Seido*
- *Adviser Intelligence*
- *Infocus Platform Plus*
- *Salesforce*
- *Podio*

plus many more
